Universidad de Valladolid

UVa

Eight Centuries of History

<https://youtu.be/Wsls-Vmaf0>

Do you know that...?

13th
century

Yes!

The UVa was established in 1241

We are one of the oldest universities in the world

We have...

4
campuses

4
cities

24
faculties and technical schools

13,361,504€
derived from the investigation

18
research laboratories

12
University Institutes

+23,000
students every year

54%
female students

5
halls of residence and University apartments

14
libraries and study areas

1.882 professors
374 researchers

45%
female professors

85.23% success rate
12.3 ratio student/teacher

We offer...

70
degree courses

13
double degrees

+70
official master's courses

19
BA/MA international degrees

6
international semesters

+200
ongoing training courses

29
doctoral programmes

176
recognised research groups

Internationalization

the opportunity to study in
79
countries

411
UVA student internships abroad

1,493 foreign students at the UVa
750 UVA students studying abroad

1,274
currents agreements signed with approximately

500
universities / institutions

Language centre

English
French
German
Italian
Portuguese
Arabic
Russian
Chinese
Japanese
Hindi
Sanskrit

+3,000
students
learning
languages at the
UVa each year

+2,000
students from **26** countries

learning
Spanish at the
UVa* each year

43% America
28% Europe
25% Asia
4% Africa

*Centre Officially
recognised by the
Cervantes Institute

At the **Language Centre**, you can learn languages and **get to know other cultures** while making **new friends from all over the world**.

Employability and more

4,801 internships

6,819 agreements
with enterprises
and institutions

Área de
Asuntos
Sociales
AS

Inclusive Education

Our goal is to achieve integration and education for all. We have a variety of programs, activities and initiatives with this aim.

Nearly
4,000 graduates
per year

health+

medical facilities (gynaecological, phoniatic and psychological free of charge)

UVa sport services

12,451 participants
in sports activities

90,000€
Allocated to the Development
Cooperation Fund

+18,000 attendees of
cultural activities

5,800 scholarships and grants
granted each year

150 doctoral thesis defended
169 patents since 2007

ERASMUS MUNDUS MSc *in* Mediterranean Forestry and Natural Resources Management

Adaptive forestry
strategies to provide
good and services
while coping with
global change
challenge

- **Four courses and a seminar**
practical examples and cases study approach.

Specialization: Adaptive forestry strategies

1. Silviculture under multifunctional objectives
2. Genetic resources conservation and Molecular Markers
3. Forest pest and diseases
4. Geo-Statistical Analysis
5. Learning by doing in forestry: New tools for new challenges

Specialization: Adaptive forestry strategies

Specialization: Adaptive forestry strategies

MASTER ON FOREST MANAGEMENT BASED ON DATA SCIENCE

Course: Silviculture under multifunctional objectives

Focused on *Bioecological scientific principles as basis for the management of Mediterranean forests.*

Special emphasis on *Non woody productions, Wildlife, Water, Risk prevention*

Subjects

- **Silvicultural diagnostic** of the forest ecosystem
- Tools for evaluate the **impacts and effects** of the silviculture on the forest ecosystem
- **Design silvicultural treatments** to attain specific objectives

Course: Genetic Resources Conservation and Molecular markers

Focused on

- i) Main problems and strategies for conservation and use of FGR*
- ii) Molecular tools to measure diversity and support decisions*

Subjects

- ✓ Evaluate the **need of conservation** of particular GR
- ✓ Decide the **strategy of conservation and use**
- ✓ Choose the **molecular tools** suitable to identify genotypes and measure diversity in forest species

Course: Forest Pest and Diseases

Focused on

identification, diagnostic and sustainable management of most relevant Forest Pest and Diseases in Mediterranean ecosystems

Subjects

- ✓ **Biology and dynamics** of main native and invasive insects
- ✓ **Sustainable management** of forests pest by semiochemicals
- ✓ **Biological control** of forest pests
- ✓ **Diagnostic of abiotic and biotic pathogens**
- ✓ **Management** the main forest pathogens from the Mediterranean forest

Course: Geo-Statistical Analysis

Focused on

Geo-statistical analyses applied to forest management
Data gathering (LiDAR, UAVs, Copernicus)
Q-GIS & R packages

Subjects

- ✓ Visualizing and exploring spatial data
- ✓ Point pattern analysis with “R”
- ✓ Unmarked, Multitype and marked point patterns
- ✓ Geostatistics: Univariate structural analysis and spatial prediction
- ✓ Geostatistics: Bivariate structural analysis and spatial prediction
- ✓ Spatial regression
- ✓ Data gathering: LiDAR (ALS, TLS), UAVs (Drones) and Copernicus

Learning by doing in forestry: New tools for new challenges

Focused on
Adaptive forest management

Subjects

- ✓ **Identify the main impacts of global change on forestry** and its opportunity to **mitigate** the Global Change effects
- ✓ Use different **quantitative approaches** to evaluate, monitor and design silvicultural methods
- ✓ Elaborate **models** to project silvicultural paths
- ✓ **Design experiments** to obtain useful information to operational forestry
